

AstroNova Material 258 Data Sheet

Updated: 6/18/2019

Product Code:

AstroNova Material 258

Print Technology:

Water-based Inkjet, dye & pigment based

Facestock Description:

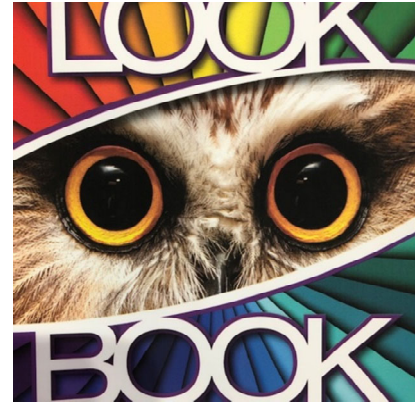

Matte white synthetic (PP) label

Adhesive Type:

Emulsion acrylic

Material Sales Description & Intended Applications:

Matte white polypropylene label with permanent emulsion acrylic adhesive. Receptive to both dye and pigment inkjet inks. Economical, this material combines the matte paper look with the tear resistance expected of a synthetic label.

Appearance:**Facestock Caliper:**

0.004"

Facestock Basis Weight:

49#

FDA Compliance:

Approved for incidental food contact (21 CFR 175.105). Functional barrier required.

Minimum Application Temperature:

-4C (+25F)

Adhesive Service Temperature:

-29C to +99C (-20F to +210F)

Liner Type:

Kraft paper liner

Liner Caliper:

0.0024"

Total Caliper:

0.0069"
